TaxiCharger
THE FASTEST
cashiering system
on earth.™
www.taxicharger.com

THE **PROBLEMS**

"We waste so much time dealing with credit card slips, vouchers, leases, loans, deposits, fees and the list goes on!"

Cashiering Manager

"Our first biggest problem is processing vouchers. It's so costly because of the manual work… sorting, adding, entering, packaging.... it never ends!"

Invoicing Manager

"I hate to even think about the losses we've incurred from mistakes and fraud... There's got to be a better way to run our cashiering."

General Manager

"We're always waiting in line too long for the cashier and I'm often confused about my fees and balances with the company."

Driver

"We are so frustrated with our invoices… there are always adding mistakes or old vouchers … Why can't they get it right?"

Client Account

"Our issues are slow cashiering... driver fraud... not getting the invoicing out quick enough… too slow manual processes… human error… salary costs… you get the picture?"

Company Owner

Do you suffer from any of these common problems?

- Too much back-office labor time?
- Administrative mistakes and lost revenue?
- Driver line-ups, complaints, or confusion?
- Client complaints or confusion?
- An overall stagnating business?
- False beliefs about launching a new cashiering
